

Company Description:

We are a Graz-based IT start-up founded in early 2018, dealing with flight data analysis and forecasting in the aviation industry. Our goal is to use artificial intelligence and modern big data methods to increase air traffic capacity, identify congestion and optimize flight paths.

Your Tasks

- You are developing our analytics tools and design innovative web applications for data visualisation and analysis
- In cooperation with our data engineers you are developing our data pipelines and furthermore you are also working independently on new microservices for our analytics tools
- Drive your own ideas for code and process improvements
- You are working agile in a scrum team and continuously benefit from feedback through pair-programming and code reviews

Your Profile

- Passion for clean code and an eye for simplicity and pragmatism
- Solid programming experience in JavaScript/TypeScript and Java/Kotlin
- Ideally you already have experience in the usage of cloud technologies (Google Cloud Platform) and working in a CI/CD environment
- General understanding of modern software architecture concepts and interest in software design
- Experience with Angular, Vert.x, Elasticsearch or Kubernetes is beneficial
- Methodical and structured way of working, ability to work conceptually, team spirit and open, communicative personality with a quick grasp of complex tasks

Our Offer

- The chance to shape the aviation industry worldwide and really change the world
- No routines, but new and challenging projects with global impact
- The chance to work for an exciting start-up and build innovative aviation solutions
- Dynamic environment with flat hierarchies and the possibility for further education
- Flexible work hours and possibilities for home office
- Taking responsibility and make independent decisions
- Attractive city centre office in a central location

For this position, a collective agreement minimum salary of € 2.518 gross per month applies (14 months gross salary per year). Clearly there is, depending on the qualification, the willingness to overpayment!
