

## Company Description:

We are a Graz-based Aviation IT company founded in early 2018, dealing with flight data analysis and forecasting in the aviation industry. The team of Aeroficial Intelligence has created the Performance Cockpit cloud platform, a smart digital solution built to deliver the worlds smartest analytics solutions for airports and air traffic control. Are you ready to be part of the team?

## Your Tasks

- In cooperation with our software developers, you are contributing to the development of the worlds leading aviation analytics solution
- Data preparation and development of productionizable methods is your daily business
- Be part of client trial phases and accompany the process to a successful implementation at the customer.
- Drive your own ideas and contribute to an open-minded team
- You are working in an agile team and continuously benefit from regular review sessions

## Your Profile

- You don't like to leave questions unanswered and love to understand data
- Passion for clean code and an eye for simplicity and pragmatism
- Solid experience in Python and SQL, familiarity with Scala and Java is an asset
- It would be a nice benefit if you already have experience in the usage of cloud technologies (e.g. Google Cloud Platform, Microsoft Azure)
- Experience using business intelligence tools (e.g. Kibana) and data frameworks
- Methodical and structured way of working, ability to work conceptually, team spirit and open, communicative personality with a quick grasp of complex tasks
- BSc/BA in Computer Science, Engineering or relevant field; graduate degree in Data Science or other quantitative field is preferred
- Nice to have: Experience in QGIS or similar GIS applications

## Our Offer

- The chance to shape the aviation industry worldwide and really change the world
- No routines, but new and challenging projects with global impact
- The chance to work in an exciting industry and build innovative solutions
- Dynamic environment with flat hierarchies and the possibility for further education
- Flexible working hours
- Taking responsibility and make independent decisions
- Attractive city centre office with roof top terrace

For this position, a collective agreement minimum salary of € 2.854 gross per month applies (14 months gross salary per year, based on 38,5h/week). Clearly there is, depending on the qualification, the willingness to overpay!
